

DEVIKA POLAVARAPU

puppy567567@gmail.com — GitHub — LeetCode — LinkedIn — +91 85001 56156

PROFESSIONAL SUMMARY

Pre-final year B.Tech Information Technology student interested in software engineering, machine learning, and data systems. Experience building projects in computer vision and geospatial analysis using real-world datasets.

EDUCATION

Velagapudi Ramakrishna Siddhartha Engineering College <i>B.Tech in Information Technology — Pre-final Year — Expected Aug 2027</i>	Vijayawada, India <i>Sept 2023 – Present</i>
--	---

TECHNICAL SKILLS

- Software Engineering:** Python, JavaScript, SQL, HTML, CSS
AI/ML & Analytics: Machine Learning fundamentals, Data Analysis
Cloud & Platforms: REST APIs, Spring Boot
Tools & Domains: MySQL, Git, GIS, Remote Sensing

PROFESSIONAL EXPERIENCE

Infosys Springboard <i>Python Full Stack Development Intern — Pragati Cohort 6</i>	Remote <i>Sept 2025 – Nov 2025</i>
- Built web application components using Python and JavaScript with database integration - Implemented backend logic and API interactions for data handling and user workflows	
EduSkills Academy <i>Java Full Stack Developer Intern</i>	Remote <i>Dec 2025 – Mar 2026</i>
- Developed full-stack web modules using Spring Boot, Hibernate, and MySQL - Implemented RESTful APIs and integrated frontend interfaces using HTML, CSS, and JavaScript	
Vodafone VOIS – EDUNET <i>Data Analytics Intern</i>	Remote <i>Sept 2025 – Oct 2025</i>
- Performed exploratory data analysis using Python and SQL on structured datasets - Generated analytical insights and reports to support data-driven decision making	

TECHNICAL PROJECTS

FoodPulse – Smart Hostel Mess Management System <i>React.js — Spring Boot — Java — MySQL — REST APIs</i>	Link <i>Jan 2026 – Mar 2026</i>
- Built a full-stack mess management platform enabling students to vote on menus and provide meal feedback - Implemented a Spring Boot REST API with MySQL database for food records, consumption tracking, and waste monitoring - Developed a React dashboard with analytics visualizations for food distribution, consumption trends, and mess usage	
WatchGuard-AI: Context-Aware AI Surveillance System <i>AI/ML — Computer Vision — Cloud Architecture</i>	Link <i>Dec 2025 – Jan 2026</i>
- Built real-time weapon detection using YOLOv8 with risk scoring - Reduced false positives using temporal confirmation Tech: Python, OpenCV, YOLOv8, Twilio API, Cloudinary	
Identifying Vulnerable Vector-Prone Areas through Remote Sensing <i>Remote Sensing — GIS — Spatial Analysis</i>	Link <i>Aug 2025 – Dec 2025</i>
- Built a district-level RS-GIS framework using Landsat-8-derived NDVI, NDWI, NDMI, elevation, and LST to identify mosquito vector-prone regions. - Applied GIS-based normalization and weighted overlay analysis to support data-driven public health risk assessment.	
Web Platform for Freelance Services and Skill Matching <i>Full Stack Development</i>	Link <i>Sept 2025 – Nov 2025</i>
- Built a platform to connect freelancers and clients using skill-based matching - Implemented front-end, back-end, and database integration Tech: Python, HTML, CSS, JavaScript, SQL	

LEADERSHIP & ACTIVITIES

ACM SIGSPATIAL Student Chapter, VRSEC <i>Chairperson</i>	Vijayawada <i>May 2025 – Present</i>
McKinsey & Company <i>Forward Program Participant</i>	Remote <i>Sept 2025 – Dec 2025</i>
National Service Scheme (NSS) <i>Volunteer – Report Writing & Events</i>	Vijayawada <i>2023 – Present</i>

ACHIEVEMENTS & CERTIFICATIONS

- Finalist, SEED Business Challenge 2026 – global business strategy competition
Pragati: Path to Future – Cohort 6 (Infosys Springboard, Data Science)
Oracle Data Platform 2025 Certified Foundations Associate
Cisco – C, Python, Introduction to Cybersecurity
TCS – Communication Skills Certification
